

Helping Companies Leverage Investments in SAP Solutions

INTEGRATED PROCESS SOLUTION

SAP Process Made Simple & Agile

SIMPLIFY ACCESS TO KEY PRODUCT DATA AND IMPROVE USER PRODUCTIVITY

Manage your business processes directly in SAP with the LeverX Integrated Process Solution (IPS).

Intelligent Workflow

Quick Workflow Modification

Simplifies Complex Processes

Fast Reaction To Change

Enables business users to define and modify workflows without IT support by using simple task building blocks and drag-n-drop workflow template building methods.

Brings all best-in-class workflow and collaboration features to both internal and external Users with a simple yet powerful SAP add-on solution.

LeverX IPS enables classic PLM execution, but also process change management for standard ERP objects throughout all your operations

Provides unified change management capability for both SAP and non-SAP users.

Enables process governance with a rules-based solution that lets your users decide where the limits should be set.

Collects all objects, processes, decisions and notes into one record for easy auditability and traceability.

Implementation is simple, with just two transports required to load it into your system.
